THE PALACE OF THE SEASONS

IMMERSIVE EXHIBITION

Grévin Montréal

Montreal, Quebec, 2013

Grévin Museum is located in the historical Eaton Centre building in the heart of downtown Montreal. Compagnie des Alpes retained the services of Moment Factory to create one of the rooms of this museum. Moment Factory's renowned Montreal artists then decided to turn to XYZ for the audiovisual production of the entire project.

Description

In addition to designing and installing all of the required infrastructure for the production of this multimedia installation, XYZ supplied, installed and programmed all of the audiovisual equipment making up this large and spectacular fresco. Mirrors are used ingeniously to vastly increase the size of the room, creating an impression of complete immersion for the visitor.

The Palace of the Seasons is a completely automated immersive work that uses control interfaces designed and produced by XYZ.
